- Bluetooth Mesh Technology
- Phone App Driven
- Tunable White
- Adjustable RGB Color
- Preset Scenes
- Dimming Capable
- Grouping Capable
- No Special Equipment Needed
- Ready To Install

- List Price: $175.00
How to Download the App

The bt app is available on the App Store for Apple devices and on the Google Play Store for Android devices.

Search “Alliance bt” and download the app with the blue bt icon.

You can also scan the QR codes below to go straight to the download page.

Basic Functions

**Tunable White**

Color temperature can be adjusted with preset buttons for 2700K, 3000K, and 4000K. A color wheel can also be used for more precise adjustments. Dimming is adjusted with an easy to use slider.

**RGB Colors**

RGB colors can be selected with preset buttons for red, green, blue, purple and amber. A RGB color wheel can also be used to select additional colors. Dimming is adjusted with an easy to use slider.

**Holiday Scenes**

Preset scenes can be selected for seasons and holidays. The time it takes for each scene to cycle colors can be adjusted with an easy to use slider.
A secured network ensures that only those with permission can access the lighting system. The lighting system functions whether it is on a secured network or not, so it is entirely up to the end user whether they want to have their lighting system on a secured network or not.

Once a fixture has been added to a secured network, that fixture is now locked into that secured network and will not be able to be controlled from the default home network. If a secured network is deleted while a fixture is still attached to that network, the user will not be able to access that fixture from the default home network. It is very important to remove all fixtures from a secured network before deleting a secured network. The app allows up to 10 secured networks at a time.

How to Create a Secured Network

Step 1: Click on the settings button in the top left corner of the dashboard. (Shown circled in red)

Step 2: Click on “Default Home.” This will bring up your list of available networks.

Step 3: Click on the “+” sign and then select “Add new home” to create a new network. Name your network.

Step 4: Click and drag left on your new network until you see a green box and a yellow box. Click on the green “Add” box.

Step 5: The bt app will begin searching for devices and adding them to the network.

Please note, fixtures that were added to an existing secured network will not be discoverable by a new secured network.

Step 6: When the bt app has finished finding all the available devices, select “No” when prompted. If there are more devices to be found, select “Yes.”

PLEASE NOTE: If you plan to create a secured network, and you also plan to name your fixtures and create groups, you should create the secured network first. When you put fixtures into a secured network, they will lose any naming or grouping that was created prior to being placed into the secured network.
How to Share a Secured Network

PLEASE NOTE: Sharing a secured network with another user allows them to access and control the fixtures, however, it does not transfer any naming or grouping.

Step 1: With the device that originally set up the secured network, click and drag left on your the network you want to share until you see a green box and a yellow box. Click on the yellow “Share” box.

Step 2: Using the device that you want to share the secured network with, click on the “+” sign and then select “Scan QR code add home” to scan the QR code from the original device. Once the QR code is scanned, the secured network is shared.

How to Remove a Device from a Secured Network

PLEASE NOTE: Removing a device from a secured network is the only way to make it accessible to the default home again. Deleting a secured network without removing the devices that are attached to it first will cause the devices to be unaccessible.

Step 1: Long press on the icon of the lamp you want to remove to bring up the control panel.

Step 2: Click on the page icon in the upper right corner to bring up the edit device panel.

Step 3: Click on the red “Remove present device” button to remove the device from the network.
How to Name the Fixtures

Step 1: From the home screen, long press on the icon of the lamp you want to rename to bring up the control panel.

Step 2: Click on the page icon in the upper right corner to bring up the edit device panel.

Step 3: Click on the current device name to bring up the input device name window.

Step 4: Use the keyboard to name the fixture and then click the yellow “Confirm” box.
How to Create a Group

Step 1: From the home screen, click on the “+” sign next to “Add Group.” To see all your groups, click on the icon in the upper right corner.

Step 2: Click on the group you want to control to bring up the options panel. Select “Manage” to bring up the group manage panel.

Step 3: Click on the “Group Name” to bring up the “Input GroupName” window.

Step 4: Use the keyboard to name the group and then click the yellow “Confirm” box.

Step 5: Click on the “GroupIcon” button and select an icon from the pop up window and then click the yellow “Confirm” box.

Step 6: Click on the “+” sign to the right of where it says “current device” to bring up the add device to group panel.

Step 7: Double click on the icons for the fixtures you want to add to the group. A single click will bring up a “+” sign over the icon, a second click will confirm that you want the fixture added to the group. The fixture will blink off and on as it is being added to the group.
How to Remove a Device from a Group

**Step 1:** Click on the “-” sign to the right of where it says “current device” to bring up the delete device to group panel.

**Step 2:** Double click on the icons for the fixtures you want to delete from the group. A single click will bring up a “-” sign over the icon, a second click will confirm that you want the fixture deleted from the group.

Get Creative!

The BL200-bt provides endless possibilities for creativity. You can control all bt fixtures and set them all to your favorite white color temperature, or your favorite color on the RGB wheel. You can create groups and give part of your landscape a different color or brightness to set it apart from the rest of your space. Use the preset scenes for different holidays and seasons. Sync all the fixtures together, or offset them by setting some groups with a different interval time using the easy slider. Show your team spirit by changing your fixtures to your favorite team’s colors on game day. The BL200-bt makes it easy to have the best looking house in the neighborhood!

We would love to see any pictures or videos showing off your creativity!

Submit your BL200-bt photos and videos to marketing@allianceoutdoorlighting.com
